

Features

- 90 t (100 USt) capacity
- 12 m 47 m (39.2 ft 154.3 ft) five-section full-power boom
- 10 m 17 m (33 ft 56 ft) manual offsettable bi-fold lattice swingaway extension
- 9979 kg (22,000 lb) standard counterweight hydraulically installed and removed
- Intuitive, user friendly controls with electronic joysticks and operator customizable function speeds
- Full vision cab with 20° tilt feature

GROVE GRT8100

The GRT8100 was designed after gathering feedback from crane owners and operators to ensure that it is loaded with the features and reliability you demand.

Features

> Cab

The cab is designed with operator comfort and productivity in mind with full-vision design and 20° tilt for improved viewing at high boom angles. The tilt/telescoping steering wheel can be positioned for optimum use.

The new Crane Control System (CCS) offers a user-friendly interface, two full graphic displays mounted vertically for easier viewing and a jog dial for easier navigation and data input. The system allows the electronic controllers to be reprogrammed by the operator for specific speed and reaction. Parts commonality across Grove, Manitowoc and Potain product lines enhances operator familiarization and serviceability.

Lifting performance is enhanced by the 12 m – 47 m (39.2 ft – 154.3 ft) five-section, full-power MEGAFORMTM boom with sequenced, synchronized extension capability. The boom system offers three operational modes of extension and retraction and one mode specifically for maintenance.

> CraneSTAR®

CraneSTAR is an exclusive and innovative crane asset management system

that helps improve your profitability and reduce costs by remotely monitoring critical crane data. Visit www.cranestar.com for more information.

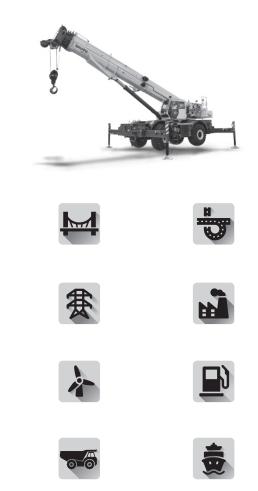

GRT8100 benefits

- > Higher nominal capacity and stronger load charts ensure higher rental rates.
- > Outstanding height and reach provide higher utilization and greater versatility.
- The GRT8100 transports to the job site quickly and efficiently with a weight under 42 323 kg (93,306 lb) after removal of counterweight and boom extension.
- Counterweight is hydraulically self-removable and installed by the crane.
- > Three operator selectable telescoping modes for flexibility in any application.
- > ECO mode for intelligent power management and decreased fuel consumption.

Manitowoc Crane Care when you need it.

The assurance of the world's most advanced crane service and support to get you back to work fast.

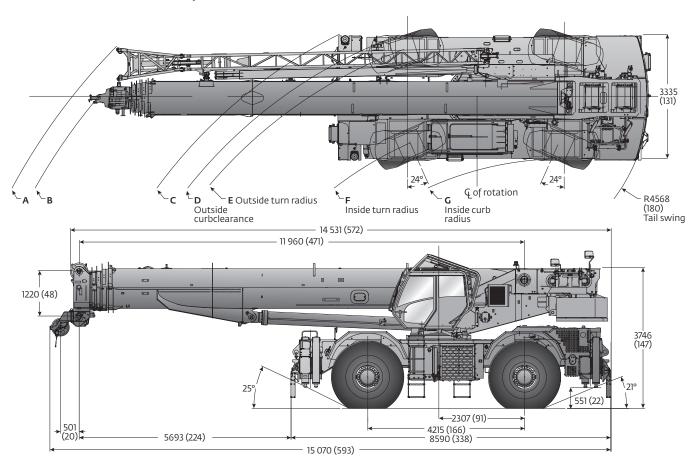

Manitowoc Finance helps you get right to work generating profits for your business. Financial tools that help you capitalize on opportunity with solutions that fit your needs.

Max. boom length at 0° boom angle (no load)		97 ft			97 ft			

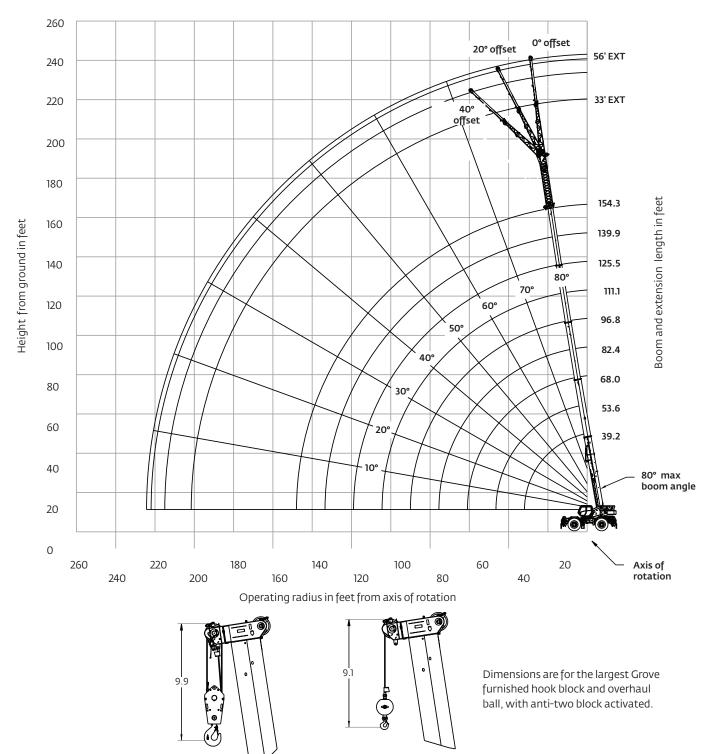

- 1. 33 ft and 56 ft folding boom extension lengths may be used for single line lifting service only.
- 2. For main boom lengths less than 154.3 ft with the boom extension erected, the rated loads are determined by boom angle. Use only the column that corresponds to the boom extension length and offset for which the machine is set up. For boom angles not shown, use rating of the next lower boom angle.
- 3. WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.
- 4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- 5. Capacities listed are with outriggers properly extended and vertical jacks set only.
- 6. When lifting over the main boom nose with 33 ft or 56 ft extension erected, the outriggers must be fully extended.

NOTE: () Boom angles are in degrees.

*This capacity is based on maximum obtainable boom angle.

THIS CHART IS ONLY A GUIDE AND SHOULD NOT BE USED TO OPERATE THE CRANE.

The individual crane's load chart, operating instructions and other instructional plates must be read and understood prior to operating the crane

- 1. 33 ft and 56 ft boom extension lengths may be used for single line lifting service only.
- 2. WARNING: Lifting with the 33 ft extension base, with the 23 ft extension fly either erected or folded along side of extension base is strictly prohibited.
- 3. Radii listed are for a 154 ft boom with the boom extension erected. For main boom lengths less than 154 ft, the rated loads are determined by the boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.

- Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- 5. Capacities listed are with outriggers properly extended and vertical jacks set only.
- 6. When lifting over the main boom nose with the 33 ft or the 56 ft extension erected and 20 ft insert, the outriggers must be fully extended.

- 1. 33 ft and 56 ft folding boom extension lengths may be used for single line lifting service only.
- 2. For main boom lengths less than 154 ft with the boom extension erected, the rated loads are determined by boom angle. Use only the column that corresponds to the boom extension length and offset for which the machine is set up. For boom angles not shown, use rating of the next lower boom angle.
- 3. WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.
- 4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- 5. Capacities listed are with outriggers properly extended and vertical jacks set only.
- 6. When lifting over the main boom nose with 33 ft or 56 ft extension erected, the outriggers must be fully extended.

NOTE: () Boom angles are in degrees. *This capacity is based on maximum obtainable boom angle. 80081443

Grove GRT8100 The individual crane's load chart, operating instructions and other instructional plates must be read and understood prior to operating the crane

Manual extension

Pounds

- The 56 ft folding boom extension length may 1. be used for single line lifting service only.
- 2. For main boom lengths less than 154.3 ft with the boom extension erected, the rated loads are determined by boom angle. Use only the column that corresponds to the boom extension length and offset for which the machine is set up. For boom angles not shown, use rating of the next lower boom angle.
- 3. WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.
- 4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- 5. Capacities listed are with outriggers properly extended and vertical jacks set only.
- 6. When lifting over the main boom nose with the 56 ft extension erected and 20 ft insert, the outriggers must be fully extended.

Min. boom angle for indicated length (no load)	36°	36°	38°	41°	4]°	44°		
Max. boom length at 5° boom angle (no load)		97 ft			97 ft			

- 1. 33 ft and 56 ft boom extension lengths may be used for single line lifting service only.
- 2. WARNING: Lifting with the 33 ft extension base, with the 23 ft extension fly either erected or folded along side of extension base is strictly prohibited.
- 3. Radii listed are for a 154 ft boom with the boom extension erected. For main boom lengths less than 140 ft, the rated loads are determined by the boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

WARNING: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.

- 4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- 5. Capacities listed are with outriggers properly extended and vertical jacks set only.
- 6. When lifting over the main boom nose withthe 33 ft or the 56 ft extension erected, the outriggers must be fully extended.

NOTE: () Boom angles are indegrees. *This capacity is based on maximum obtainable boom angle.

THIS CHART IS ONLY A GUIDE AND SHOULD NOT BE USED TO OPERATE THE CRANE.

NOTE: () Reference radii in feet.

1. Capacities are in pounds and do not exceed 75% of tipping loads as determined by test in accordance with SAE J765.

- 2. Capacities are applicable to machines equipped with General / Titan 29.5x25 (34 ply) bias ply tires, at 76 psi cold inflation pressure.
- 3. Capacities are applicable only with machine on firm level surface.
- 4. On rubber lifting with boom extension not permitted.
- 5. For pick and carry operation, boom must be centered over front of machine, mechanical swing lock engaged and load restrained from swinging.
- 6. Axle lockouts must be functioning when lifting on rubber.
- 7. All lifting depends on proper tire inflation, capacity and condition. Capacities must be reduced for lower tire inflation pressures. See lifting capacity chart for tire used. Damaged tires are hazardous to safe operation of crane.
- 8. Creep not over 200 ft of movement in any 30 minute period and not exceeding 1 mph.

Load handling

Weight reductions for load handling devices				
Auxiliary boom nose	130 lb			
Hook blocks and headache balls:				
100 USt, 6-sheave	1481 lb+			
90 USt, 5-sheave	1327 lb+			
65 USt, 5-sheave	1280 lb+			
50 USt, 3-sheave	1000 lb+			
25 USt, 1-sheave	657 lb+			
12 USt overhaul ball	558 lb+			

+Refer to rating plate for actual weight.

Tire inflation - PSI (bar)				
Size (front and rear)	TRA Code	Lifting service, general travel and extended travel		
rear)		Static, creep and 2.5 mph (4.0 km/h)		
29.5 x 25 (34)	E-3	76 (5.2)		

Line pulls and reeving information				
Hoists	Cable Specs.	Permissible Line Pulls	Nominal Cable Length	
Main and Auxiliary	19 mm (3/4 in) 35x8 Class Rotation Resistant (non-rotating) Min. Breaking strength 85,800 lb	17,160 lb*	702 ft	
Main and Auxiliary	22 mm K™100 Hoist Rope Min. Breaking strength 84,000 lb	16,800 lb*	722 ft	

The approximate weight of 3/4 in wire rope is 1.5 lb/ft. The appoximate weight of 22 mm synthetic rope is 0.21 lb/ft. *With certain boom and hoist tackle combinations, the allowable line pull may be limited by hoist performance. Refer to Hoist Performance table for lift planning to ensure adequate hoist performance on drum rope layer required.

33 ft - 56 ft folding boom extension					
Without blockWith 558 lbor balloverhaul ba					
*33 ft extension (erected)	5800 lb				
*56 ft extension (erected)	7400 lb	11,100 lb			
Folding ext. with 20 ft insert					
*56 ft extension 13,000 lb 17,900 lb					

*Reduction of main boom capacities

(no deduct required for stowed boom extension)

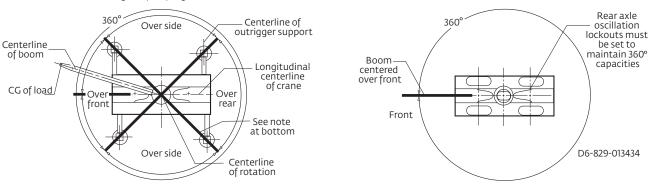

NOTE: All load handling devices and boom attachments are considered part of the load and suitable allowances MUST BE MADE for their combined weights. Weights are for Grove furnished equipment.

NOTE: When operating at temperatures below -40°F, capacities shall be derated 3.6% of rated load for each degree Fahrenheit below -40°F without shock load.

Hoist performance					
	Hoist line pulls		Drum capacity (ft)		
Wire	Two speed hoist				
rope layer	Low	High			
	Available lb	Available lb	Layer	Total	
1	23,468	12,957	108.7	108.7	
2	21,553	11,900	118.4	227.1	
3	19,927	11,003	128.1	355.2	
4	18,530	10,231	137.7	492.9	
5	17,315	9560	147.4	640.3	
6	16,250	8972	157.1	797.4	

*Refer to Line Pulls and Reeving Information table for max. lifting capacity of wire rope.

Synthetic rope layer height may vary and may reduce available line pull per layer.

Working area diagram

Diagram for lifting on tires

Bold lines determine the limiting position of any load for operation within working areas indicated.

Specifications

Superstructure

📕 Boom

12 m – 47 m (39.2 ft – 154.3 ft) five-section, sequenced synchronized, full-power boom with three operator selectable modes of extension and retraction. Any mode can be enabled or disabled to offer all modes or limited mode depending on user or application usage. Maximum tip height: 50 m (165 ft)

masimum up neight. 50 m (105 ft)

*Optional manual bi-fold swingaway extension 10 m - 17 m (33 ft - 56 ft) bi-fold lattice swingaway extension. Offsettable at 0°, 20°, and 40°. Stows alongside base boom section. Electric motor assist for stowing and pin alignment.

Maximum tip height: 67 m (220 ft)

*Optional hydraulic bi-fold swingaway extension 10 m – 17 m (33 ft – 56 ft) bi-fold lattice swingaway extension. Hydraulic luffing offset from 0° to 40°. Stows alongside base boom section. Electric motor assist for stowing and pin alignment.

Maximum tip height: 67 m (220 ft)

*Optional lattice extension insert

(1) x 6 m (20 ft) lattice extension insert. Installs between boom nose and either optional extension. Maximum tip height: 72,9 m (239.4 ft)

🔳 Boom nose

Five Nylatron sheaves mounted on heavy-duty tapered roller bearings with removable pin-type guards. Quick-reeve type boom nose. Removable single sheave auxiliary boom nose with removable pin type rope guard.

Boom elevation

One double-acting hydraulic cylinder with integral holding valve provides elevation from $\mbox{-}3^\circ$ to $\mbox{+}80^\circ.$

Crane Control System (CCS)

"Graphic Display" RCL load moment and anti-two block system with audio-visual warning and control lever lockout. This system provides electronic display of boom angle, boom length, load radius, boom tip height, maximum permissible load, actual load and warning of impending two-block condition. The work area definition system allows the operator to pre-select and define safe working areas. If the crane approaches the pre-set limits, audio-visual warnings aid the operator in avoiding job site obstructions. ECO mode system to control engine R.P.M. to lower noise and improve fuel consumption.

Counterweight

Standard 9979 kg (22,000 lb). Hydraulically installed and removed. Controls located on superstructure.

 $^*\rm Optional$ 12 247 kg (27,000 lb) one-piece counterweight. Hydraulically installed and removed. Controls located on superstructure.

*Optional 2268 kg (5000 lb) pinned slab increases counterweight to 12 247 kg (27,000 lb) hydraulically installed and removed with standard counterweight.

Operator-controlled 20° hydraulic tilt, full vision, all steel fabricated with acoustical lining and tinted safety glass throughout. Deluxe seat with headrest, incorporates armrest-mounted electronic programmable single-axis or dual axis controllers and a jog dial for easier data input. Tilt/telescoping steering wheel with various controls incorporated into the steering column. Other standard features include hot water heater, cab circulating air fan, sliding side and opening rear window, sliding skylight with electric wiper and sunscreen, electric windshield wash/wipe, fire extinguisher, seat belt, air conditioning and dual cab mounted work lights.

🕇 Swing

Variable speed, planetary swing drive with foot applied multi-disc proportional wet brake. Spring applied, hydraulically released swing brake. Two position mechanical swing lock pin, operated from cab. Maximum swing speed: 2 rpm

Hoist (main and auxiliary hoist)

Planetary reduction driven by axial piston motor. Grooved drum with automatic spring applied multi-disk wet brake. Electronic hoist drum rotation indicator. Third wrap indictor with hoist function cut-out standard. Maximum hoist single line pull:

1st layer: 10 645 kg (23,468 lb) 3rd layer: 9039 kg (19,927 lb) 6th layer: 7371 kg (16,250 lb) Maximum permissible single line pull: 7620 kg (16,800 lb) with 35 x 7 class rope Maximum hoist single line speed (no load): 148 m/min (487 ft/min) Rope construction: 35 x 7 rotation - resistant Rope diameter: 19 mm (3/4 in) Rope length: Main hoist: 214 m (702 ft) Aux. hoist: 214 m (702 ft) Maximum usable rope: 241 m (790 ft) 6 layers

* Denotes optional equipment

Specifications

Carrier

🖫 Chassis

Parallel box section fabricated from high-strength, low-alloy steel with integral outrigger boxes, front and rear lift, tie-down, and towing lugs.

Dutrigger system

Four hydraulic telescoping single stage double box beam outriggers with inverted jack cylinders and integral jack holding valves. Three position settings, 0%, 50%, and fully extended. Aluminum fabricated outrigger floats 609,6 mm (24 in) diameter. Outrigger monitoring system with outrigger beam position display on R.C.L. screen. Maximum outrigger pad load: 57 290 kg (126,300 lb)

Ы Outrigger controls

Controls and crane leveling indicator located in cab. Extension and retraction are through the CCS system.

Hydraulic system

Two main pumps [2] variable displacement piston and [1] gear with a combined output capacity of 496 L/min (131 gal/min).

Maximum operating pressure: 276 bar (4000 psi)

Return line in-tank filter with full flow by-pass protection and service indicator. Replaceable cartridge with 4 micron filtration rating per ISO cleanliness level of 17/15/12. Carrier mounted oil cooler with thermostatically controlled hydraulic motor driven fan / air to oil. System pressure test ports.

Engine (Tier 4F)

Cummins QSB6.7L diesel six cylinder, turbo-charged with Cummins Compact Catalyst (CCC) and selective catalytic reduction (SCR) combo muffler, using diesel exhaust fluid (DEF) injection. Meets emissions per U.S. EPA Tier 4F and E.U. Stage IV.

275 hp (205 kW) at 2500 rpm, Maximum torque: 730 lb/ft (990 Nm) at 1500 rpm. Fuel requirements: Maximum of 15 ppm ultra-low sulfur diesel fuel + diesel exhaust fluid (DEF).

NOTE: Required for sale in North America and European Union.

👤 Engine (Tier 3)

Cummins QSB6.7L diesel six cylinder, turbo-charged with 275 hp (205 kW) at 2500 rpm, Maximum torque: 730 lb/ft (990 Nm) at 1500 rpm. Fuel requirements: Maximum of 5000 ppm. Sulfur diesel fuel. NOTE: Required for sale outside of N.A. and European Union.

Fuel tank capacity

312 L (82 gal)

C Transmission

Rangeshift with six forward and six reverse speeds. (Three speeds high and three speeds low). Front axle disconnect for 4 x 2 drive.

🛨 Axles

FRONT: Drive / steer with differential and planetary reduction hubs rigid mounted to frame.

REAR: Drive / steer with differential and planetary reduction hubs pivot mounted to frame. Automatic full hydraulic lockouts on rear axle permits 254 mm (10 in) of oscillation only with boom centered over the front.

O Brakes

Full hydraulic split (dual) circuit dry disc operating on all wheels with dual calipers. Parking brake is spring applied / hydraulically released on the front axle input shaft.

Fully independent power steering. Front: Fully hydraulic steering wheel controlled. Rear: Fully hydraulic via separate momentary switch provides infinite variations 4 steering modes, front only, rear only, coordinated and crab. Rear steer not aligned indicator. Outside 4WS coordinated steer radius: 7,3 m (23.9 ft) Inside 4WS coordinated steer radius: 4,9 m (16.0 ft)

<u></u>	Tire	S				
29.5	x 25 –	34	bias	ply	ratii	١g

← Electrical system Two 12 V maintenance-free batteries with disconnect. 24 V system / 24 V lighting

Full lighting including turn indicators, LED head, tail, brake and hazard warning, and two halogen work lights mounted on cab front.

Maximum Drive Speed

24,1 km/h (15 mph) with 9979 kg (22,000 lb) counterweight 16 km/h (10 mph) with 12 247 kg (27,000 lb) counterweight

Gradeability (theoretical)

70% to drive train stall based on 55 763 kg (122,935 lb) GVW with 29.5 x 25 tires, standard counterweight, auxiliary hoist and manual bi-fold extension.

Miscellaneous standard equipment

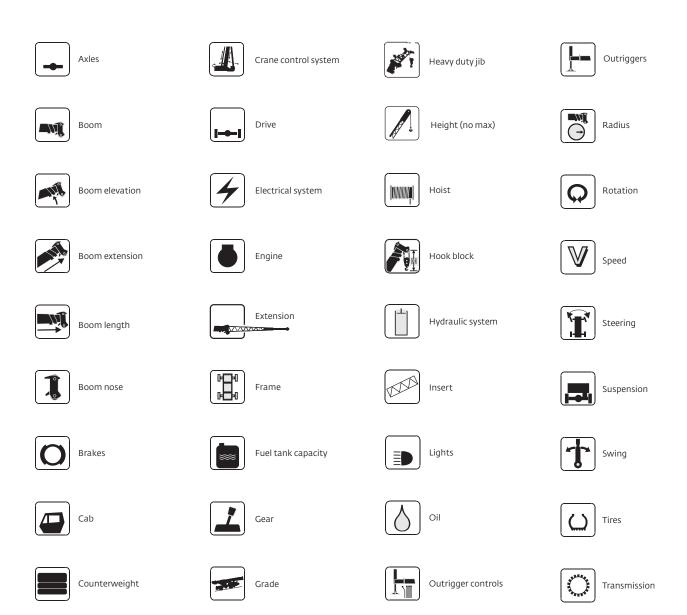

Full length steel fenders with full aluminum decking, dual rear view mirrors, hook block tie-down, electronic back-up alarm, front stowage tray, hot water cab heater / defroster, cab air conditioner, hoist mirrors, hourmeter, A/V warning system, combination lift/tie-down/towing lugs, coolant sight level indicator, hoist access platform, CraneSTAR asset management system.

*Optional equipment

• Auxiliary Hoist Package: Includes MTW 19-241 hoist with electronic hoist drum rotation indicator, third wrap indicator with hoist function cut-out, 214 m (702 ft) of 19 mm (3/4 in.) of 35 x 7 class rotation resistant wire rope. • Auxiliary Lighting and Convenience Package: Includes superstructure mounted amber flashing light, dual base boom mounted floodlights, in-cab R.C.L. light bar and rubber mat for storage trough.

- 10 m 17 m (33 ft 56 ft) Manual bi-fold swingway extension
- 10 m 17 m (33 ft 56 ft) hydraulic luffing extension
- 3 m (10 ft) heavy-duty extension with two sheaves
- 5000 lb (2268 kg) additional counterweight slab
- 360° NYC style mechanical swing lock
- Rear pintle hitch
- Cab-controlled cross axle differential locks (front and rear)
- Wireless wind speed indicator
- Vertical R.C.L. light tower
- -29C / -20F cold weather package
- -40C / -40F arctic weather package
- Electric drive line retarder
- Emergency stop buttons on each side of carrier
- Second beacon light
- Refinery package (certified spark arrestor + engine air shutdown) (T3 engine only)
- C.E. certificate package
- Russian certificate package
- Synthetic rope for main and / or auxiliary hoist
